

Friendship bracelet with squares

By Stefan Hedman steffe.se/friendshipbracelets

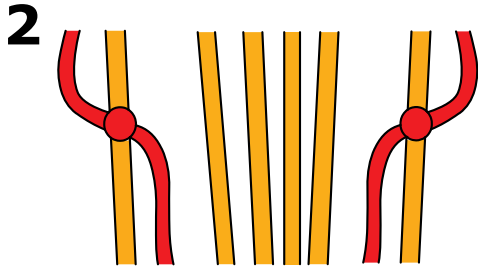

To make this bracelet, you will need yarn or threads in different colours. In this example I've used 8 threads. The length should be about 50 cm when you start to tie. To the right you see a solution for starting.

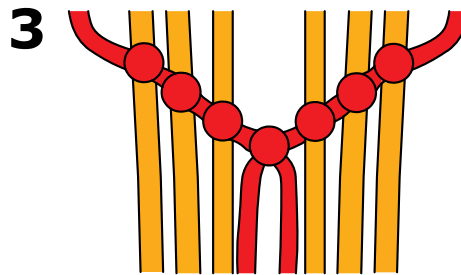

"Sno ihop" en knippe trådar med en överhandsknop.

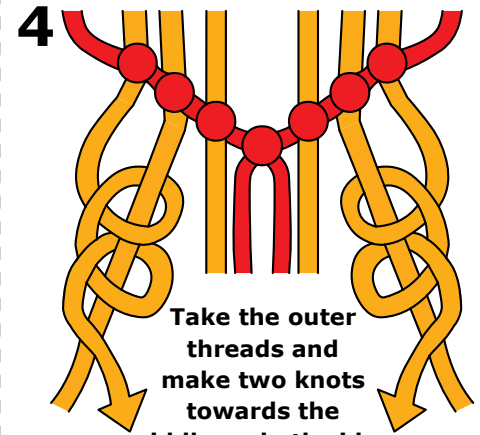

Start with the outer threads and make knots towards the middle as the picture shows.

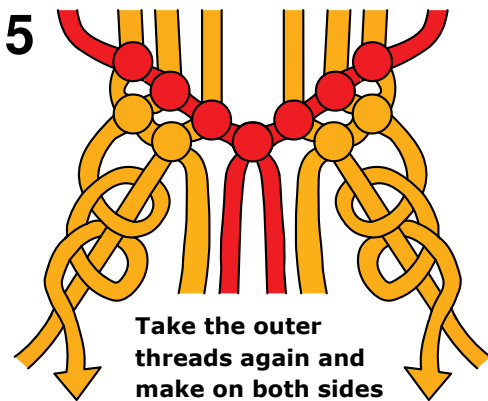

If you've done it right and tightened the knots, it will look about like this.

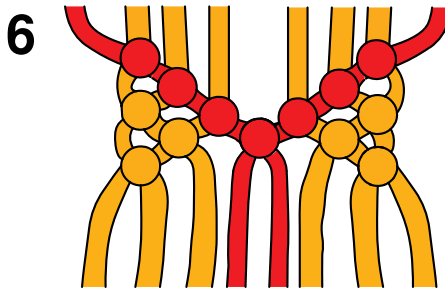

Continue to make knots towards the middle, using the same threads. When they meet, make either a left- or a right-hand knot.

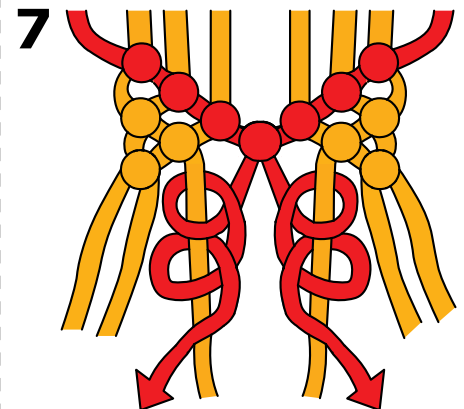

Take the outer threads and make two knots towards the middle on both sides.

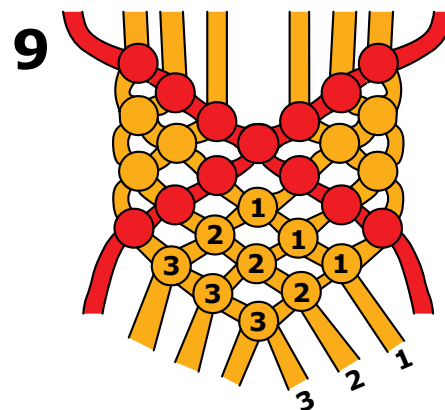

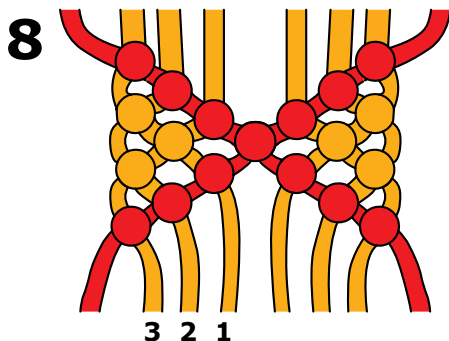

Take the outer threads again and make on both sides one knot towards the middle.

When you're done, it'll look about like this. In the next step you're going to use the threads in the middle and make outward knots.

As said, take the inner threads and do as the picture shows.

When you're done, it'll look like this. Now, take thread marked 1 in the picture, and make three knots to the right. After that, you can take thread 2 and do the same thing. And after that, with thread 3. See the next picture.

10 Now you can start at step 1 again, and repeat until the bracelet is long enough. You'll get this pattern:
